

PROFILE

A motivated fresher passionate about web development and continuous learning, skilled in the latest languages and frameworks. Eager to apply my expertise in real-world projects while staying updated with industry trends.

EDUCATION

COLLEGE

St. Joseph's Institute of Technology | Information Technology

CGPA: 7.6

SCHOOL

A.K.T Matriculation higher secondary school

SSLC : 77.8% **HSC :** 54.3%

SKILLS

LANGUAGES

- HTML,CSS,Sass,Javascript,React js.

FRAMEWORKS/LIBRARIES

- BOOTSTRAP,TAILWIND.

PROJECT

PORTFOLIO

- **Technologies Used:** Built a fully responsive personal portfolio to showcase projects and skills, utilizing SCSS for modular styling and JavaScript for interactive features, ensuring an engaging user experience across all devices.
- **Technologies Used:** HTML, CSS,SCSS and Javascript.

TODO LIST

- **Technologies Used:** Developed a dynamic to-do list application that allows users to add, remove, and mark tasks as complete. Utilized JavaScript for interactive functionality and a responsive layout to ensure usability across all devices.
- **Technologies Used:** HTML, CSS and Javascript.

JOKEBOX

- **Technologies Used:** Developed a responsive joke website that dynamically fetches and displays random jokes from an external API using JavaScript. Designed an intuitive layout to ensure an engaging browsing experience across all devices.
- **Technologies Used:** HTML, CSS,Javascript and API.

FOOD MART

- **Technologies Used:** Developed a responsive food mart website to list products, apps, and discounts with a clean layout using SCSS for modular styling. Optimized for seamless browsing across desktops, tablets, and mobile devices with a flexible grid system.
- **Technologies Used:** HTML, CSS and SCSS.

REAL ESTATE

- **Technologies Used:** Built a responsive real estate platform using HTML and Tailwind CSS to display property listings for sale or rent. Utilized Tailwind's utility-first classes for fast, customizable styling, ensuring a clean, mobile-friendly design with smooth layouts and organized property details.
- **Technologies Used:** HTML, CSS and Tailwind CSS.

HOME0

- **Technologies Used:** Designed and developed a responsive property listing platform for browsing houses available for sale or rent. Focused on creating a mobile-friendly interface with intuitive navigation, well-organized property details, and images.
- **Technologies Used:** HTML and CSS.
